PROFILE

Motivated and detail-oriented MCA student with hands-on experience in full-stack development and strong problem-solving abilities. Passionate about building efficient and user-friendly applications with a focus on modern web technologies. Eager to contribute and grow in a challenging tech-driven environment.

TECHNICAL SKILLS

Languages: C,Python,PHP,JavaScript (ES6+)
Frontend Development: HTML5, CSS3, React.js, Tailwind CSS,Bootstrap
Backend Development: Node.js, Express.js, Flask(basics), Django
Database: MySql,MongoDB(basics),PHPMyAdmin
Tools Platforms: Git, GitHub, VS Code, Jenkins
Soft Skills: Leadership,Time Work, Decision Making

EDUCATION

Master of Computer Applications (MCA)

Anand Institute of Management and Information Science, Gujarat Technological University

2024-2026

- CGPA: 8/10

Bachelor of Computer Applications (BCA)

Anand Commerce College, Sardar Patel University

2021-2024

- CGPA: 6.86/10

Higher Secondary Education (12th)

Maruti Hightschool,Nes

2020-2021

- Per: 67.73

Higher Secondary Education (10th)

Maruti Hightschool,Nes

2018-2019

- Per: 64.05

EXPERIENCE

React frontend developer(Intern)

4 Months

- Developed responsive web applications using React.js, created reusable components, integrated REST APIs, managed state with React Hooks, and collaborated with the team using Git/GitHub.

Android Frontend Development Intern

2 Months

- Worked as a Frontend Developer using Android Studio to design and implement user interfaces for mobile applications.

PROJECTS

1) E-commerce module in paisavara(React js,Django)

Group Project (Team of 2)

- Developed an E-commerce management module for the Paisavara platform to manage products, orders, and website content efficiently. The system allows administrators to control various aspects of the e-commerce platform through a centralized dashboard.
- Developed the frontend of the Paisavara E-commerce Custom Website using React.js and Tailwind CSS, created responsive and reusable UI components.

2) GreenSwitch - Monitoring Dashboard (IOT,Flask)

Group Project (Team of 6)

- Built an IoT-based smart monitoring and control system using Flask, enabling real-time visualization of sensor data such as temperature and power usage. Developed an interactive web dashboard to display live logs and system metrics. Implemented manual controls to remotely operate devices like lights and fans through the UI. Integrated backend logic to process sensor inputs and trigger hardware actions efficiently.

3) Hotel Management Portal(Python Tkinter)

Solo Project

- I developed a Hotel Management System using Python Tkinter and SQLite to simplify hotel operations. In this project, I created a user-friendly GUI to manage customer details, room bookings, payments, and room availability
- I used SQLite to store all records and implemented CRUD operations to make the system efficient and easy to use.

4) LettrBox – Online Application Portal (MERN Stack)

Team Project

- Digitized the student application process with online submissions and subject-wise faculty approvals to reduce paperwork and improve workflow efficiency.
- Allows students to submit and monitor application requests online, while providing admins with real-time tools to review, approve, or reject submissions efficiently.

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation on Forage - July 2025

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau
- Used Excel to classify data and draw business conclusions

Winner - Hackathon CodeMonthan 2.0 - (AIMIS,2025)

- Awarded the Winner Certificate in a hardware-based hackathon for building an innovative and functional prototype
- Designed and developed the complete hardware solution, showcasing strong technical skills, creativity, and real-world problem-solving

COMPETITIONS AND EVENTS

- 1) Secret Syntax Quest – Oriana 2025, Anand Institute of Management and Information Science
- 2) Quiz-O-Holic, Oriana 2025, Anand Institute of Management and Information Science
